

The New Capacitive Touch Joey

The Joey you know and love with an all new look and great new features. Now with capacitive touch, in both 6 and 9 button models, pre-programmed for a large range of applications.

Directly control your equipment via Infra Red and extended range RS232. The new Joey Micro 6 and 9 really are a complete control solution.

Fully Customisable

Joey Micro 6 and 9 come as complete kits and can control multiple devices. Design your own layout in landscape or portrait orientation for 6 or 9 button configurations using the simple drag and drop style Joey authoring program.

- Infra-Red
- RS232
- Contact Closure

Smart Technology

The Joey Micro will save you money by managing your equipment. The Joey Micro is smart enough to know when a room is empty and will shut the room down; especially important where projectors are installed. The Joey Micro does this by tracking time, key presses and room movement.
